Machine Learning Regression Using R2 Value Method

1. **Multiple Linear Regression –> R2 Value is 0.9358**
2. **Support Vector Machine:**

S.No	Type of Regression	kernel	C	Hyper Tuned Parameters	r_Score
1	SVR	linear	10	regressor = SVR (kernel = 'linear', C = 10)	-0.0396
2	SVR	linear	100	regressor = SVR (kernel = 'linear', C = 100)	0.1065
3	SVR	linear	500	regressor = SVR (kernel = 'linear', C = 500)	0.5929
4	SVR	linear	1000	regressor = SVR (kernel = 'linear', C = 1000)	0.7803
5	SVR	linear	2000	regressor = SVR (kernel = 'linear', C = 2000)	0.8768
6	SVR	linear	5000	regressor = SVR (kernel = 'linear', C = 5000)	0.9004
7	**SVR**	**linear**	**10000**	**regressor = SVR (kernel = 'linear', C = 10000)**	**0.9240**
8	**SVR**	**rbf**	**10**	**regressor = SVR (kernel = 'rbf', C = 10)**	**-0.0568**
9	SVR	rbf	100	regressor = SVR (kernel = 'rbf', C = 100)	-0.0507
10	SVR	rbf	500	regressor = SVR (kernel = 'rbf', C = 500)	-0.0243
11	SVR	rbf	1000	regressor = SVR (kernel = 'rbf', C = 1000)	0.0068
12	SVR	rbf	2000	regressor = SVR (kernel = 'rbf', C = 2000)	0.0675
13	SVR	rbf	5000	regressor = SVR (kernel = 'rbf', C = 5000)	0.2124
14	SVR	rbf	10000	regressor = SVR (kernel = 'rbf', C = 10000)	0.3719
15	SVR	sigmoid	10	regressor = SVR (kernel = 'sigmoid', C = 10)	-0.0547
16	SVR	sigmoid	100	regressor = SVR (kernel = 'sigmoid', C = 100)	-0.0305
17	SVR	sigmoid	500	regressor = SVR (kernel = 'sigmoid', C = 500)	0.0706
18	SVR	sigmoid	1000	regressor = SVR (kernel = 'sigmoid', C = 1000)	0.1851
19	SVR	sigmoid	2000	regressor = SVR (kernel = 'sigmoid', C = 2000)	0.3971
20	SVR	sigmoid	5000	regressor = SVR (kernel = 'sigmoid', C = 5000)	0.7307
21	SVR	sigmoid	10000	regressor = SVR (kernel = 'sigmoid', C = 10000)	0.8535
15	SVR	poly	10	regressor = SVR (kernel = 'poly', C = 10)	-0.0537
16	SVR	poly	100	regressor = SVR (kernel = 'poly', C = 100)	-0.0198
17	SVR	poly	500	regressor = SVR (kernel = 'poly', C = 500)	0.1147
18	SVR	poly	1000	regressor = SVR (kernel = 'poly', C = 1000)	0.2662
19	SVR	poly	2000	regressor = SVR (kernel = 'poly', C = 2000)	0.4810
20	SVR	poly	5000	regressor = SVR (kernel = 'poly', C = 5000)	0.7937
21	SVR	poly	10000	regressor = SVR (kernel = 'poly', C = 10000)	0.8130

(**The Highest R2 Value is Highlighted in Color – Green** and **The Lowest R2 Value is Highlighted in Color – Red**)

3. **Decision Tree :**

S.No	Type of Regression	criterion	splitter	max_features	r_Score
1	DecisionTreeRegressor	squared_error	best	**NA**	0.9248
2	DecisionTreeRegressor	squared_error	random	**NA**	0.9089
3	DecisionTreeRegressor	friedman_mse	best	**NA**	0.9420
